

Smart Sites

An affordably smart solution

What are Smart Sites?

Smart Sites provide a simple and affordable way to quickly get a site launched on the web.

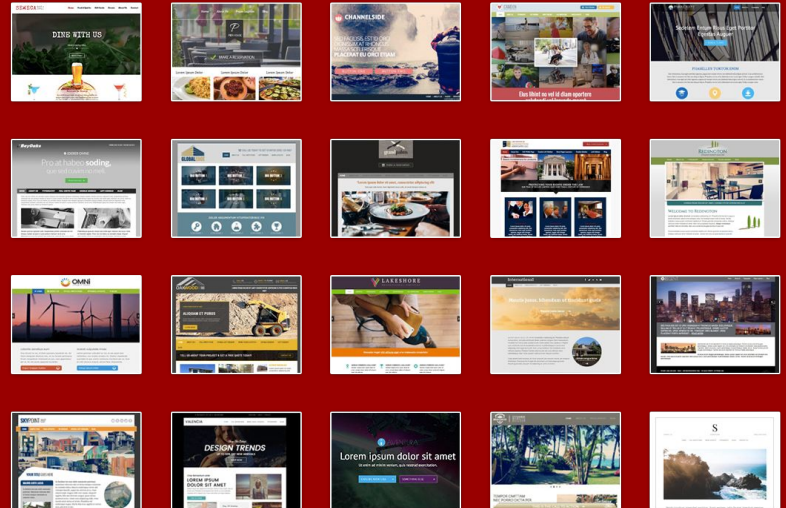

They are a great choice for businesses that are just starting out or for those with a small web budget. For less than the cost of a cup of coffee per day, the end result is a gorgeous, professionally designed site that looks great on both desktop and mobile devices.

Pick A Design

The reason Smart Sites can be launched so quickly is that you choose a premade design. Below is a sample of the available designs... check our website for the complete collection.

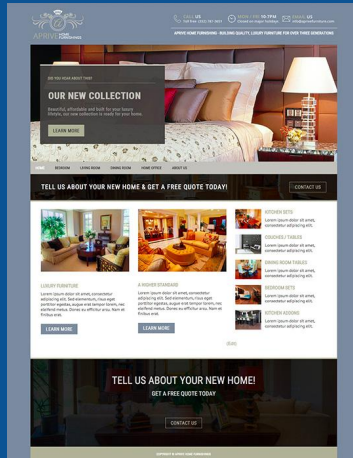

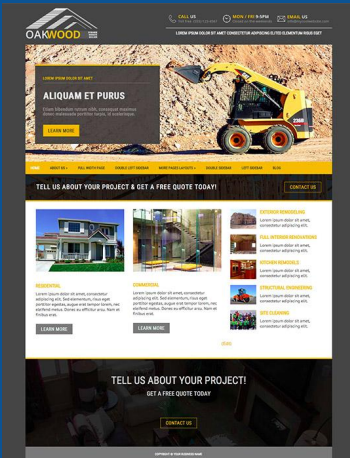

How Does It Look?

We change the colors, images, logo, etc... to match your brand and your color scheme.

To show you, we customized a version of Oakwood (which in the demo looks great for a construction company) to look like a high-end furniture store.

What's Included?

Everything you need for a professional, modern website. There are no large upfront development fees, **just one low monthly fee.**

- ✓ Customized Color Scheme
- ✓ Responsive Design
- ✓ Up to 5 pages of content
- ✓ Basic Contact Form (Optional)
- ✓ Web Hosting
- ✓ SSL Certificate
- ✓ WordPress & Plugin Updates

Need Something Extra?

If you are interested in a Smart Site, but your site needs additional pages or functionality that isn't included in the monthly cost, you can add on any additional features you'd like for a one time fee and then each month going forward it will be the standard monthly fee.

The following is a list of some examples of additional functionality that can be added onto your Smart Site.

- ✓ E-Commerce
- ✓ Image Galleries
- ✓ Client Portal
- ✓ Online Application Form

Get Your Smart Site Today
